SUMMARY

Full stack software engineer with hands-on experience building and maintaining production web applications, from designing reusable front-end libraries to developing secure, scalable backend systems. Comfortable working across the entire stack and collaborating closely with cross-functional teams to ship reliable features. Driven by continuous learning and a genuine interest in solving real-world problems through clean, maintainable code.

WORKING EXPERIENCE

Ernst & Young (EY)

Full Stack Developer

Kuala Lumpur, Malaysia

October 2024 – Present

- **Spearheaded development and maintenance** of a dual-portal (front-office/back-office) compliance submission platform for **Consumer Credit Commission (CCC) of Malaysia** built with **Angular 21**, Node.js/Express, and TypeScript, streamlining corporate regulatory filings and improving operational efficiency for end users.
- **Implemented** role-based access control (**RBAC**) in the backend API, including company-scoped group/role validation and duplicate-user prevention, to enforce secure multi-tenant boundaries across the platform.
- **Designed and published** two reusable Angular libraries — a **dynamic form engine** and a **dynamic view renderer** — now powering **20+ configurable regulatory submission forms** in production and eliminating the need for form-specific hardcoded UI.
- **Built PDF generation and templated email notification pipelines** for regulatory submission workflows, and integrated **Firebase Authentication** with **TOTP/MFA** to strengthen account security across both applications.
- **Delivered type-safe REST APIs using Prisma ORM and TSOA**, and contributed to 70+ merged pull requests as part of a cross-functional team following a structured code review and ticket-based workflow.
- **Investigated backend and infrastructure errors** on Google Cloud Platform (**GCP**) using **Cloud Logging** to trace root causes, identifying potential Web Application Firewall (**WAF**) and **CORS** policy issues in **Cloud Armor** and escalating findings to the relevant infrastructure team for resolution.
- **Monitored CI/CD build and deployment pipelines** after each push to verify successful releases and catch infrastructure-level failures early.

Ryt Bank

Tech Intern, Software Development Testing

Kuala Lumpur, Malaysia

September 2023 – March 2024

- **Executed 50+ test cases** via **JIRA** during Phase 1 user acceptance testing (**UAT**) of a digital banking application, covering functional usability and low-risk/high-risk payment and transfer flows, and reported defects through to resolution.
- **Simulated end-to-end data encryption workflows** using Alibaba Cloud Key Management Service (**KMS**) via both the command-line interface (**CLI**) and SDK, building a Python Flask microservice to demonstrate secure server-client data exchange.
- **Provisioned and configured a web application** environment on **Alibaba Cloud** using Elastic Compute Service (**ECS**), ApsaraDB for RDS, Object Storage Service (**OSS**), and Server Load Balancer (**SLB**).

HIGHLIGHTED PROJECTS

Gadget Universe: e-Commerce Project

May 2024

Full Stack Developer - [gadgetuniverse.onrender.com]

- **Developed a comprehensive** eCommerce platform using the **MERN stack (MongoDB, React, Express.js, Node.js)** featuring robust functionalities for product management, user authentication, authorization, and order processing that deployed on **Render**.
- **Integrated the Stripe API** for secure and efficient payment processing using card during checkout. Utilized **Redux Toolkit** for efficient state management across the application and reducing boilerplate code.
- Implemented secure user registration and login using **bcrypt** for password encryption and **JSON Web Tokens (JWT)** for session management, with tokens stored securely in **HTTP Only cookies**.
- Configured **Nodemailer** to handle email notifications, including sending reset password emails with dynamically generated tokens.
- Used **MongoDB Atlas** for scalable and reliable cloud-based database management, ensuring data persistence and security.

CampVenture

April 2024

Full Stack Developer - [guarded-brook-77953-c2f2c375b2e1.herokuapp.com]

- **Developed a campground website application** where user can discover campgrounds through map, create, and review campgrounds, featuring secure user authentication with **Passport.js** and deployed the application on **Heroku**.
- Integrated **Mapbox** for interactive maps and geolocation features, **Cloudinary** for multiple image uploads per campground and use **Unsplash API** to fetch and generate beautiful random campground images for the website.
- Implemented data validation and sanitization with **Joi** and secured the application against **MongoDB injection** and **XSS attacks**.

SereneMinds: Sentiment Analysis Approach to University Student Mental Health

June 2023

Full Stack Developer - [github.com/aimxnaim/sentiment_analysis]

- **Designed and developed a mental health website** that providing a secure and anonymous platform for university students to express their thoughts and feelings. (Python Flask, HTML, CSS, JavaScript, Bootstrap). Utilized **Plotly** and **D3.js** to create interactive charts and graphs, enhancing data representation of the sentiment analysis on the SereneMinds dashboard. (JavaScript ES6)
- Implemented a sentiment-analysis algorithm using **Logistic Regression** in **Python** to analyze user input text and determine if they exhibit symptoms of a mental health problem. (Scikit-Learn, NumPy, Pandas)

EDUCATION

University Technology of MARA (UiTM)

Jasin, Melaka

Bachelor of Computer Science (Hons.)

Oct 2019 – December 2023

- CGPA: **3.53/4.00** (First Class Honours)

Pahang Engineering Matriculation College

Jengka, Pahang

Matriculation

June 2018 – May 2019

- CGPA: **3.93/4.00** (First Class Honours)

AWARDS & ACHIEVEMENTS

- [National] **TECH Pride 2023** - Gold Award (19 January 2023) [[Link](#)]
- [International] **Programming Competition C-PROM 2022** (26 September 2022) [[Link](#)]

SPOKEN LANGUAGES

English, *Bahasa Melayu* (Malay) – Able to speak & write formally and informally.

CERTIFICATIONS

- | | |
|---|-----------------------------------|
| • Angular Crash Course for Busy Developers (Udemy) | May 2026 [Link] |
| • Web Developer Bootcamp (Udemy) | May 2024 [Link] |
| • ACA Business User (Alibaba Cloud) | Feb 2024 [Link] |
| • ACA Cloud Computing (Alibaba Cloud) | Feb 2024 [Link] |
| • Python for Data Science, AI & Development (Coursera) | Apr 2023 [Link] |

EXTRACURRICULAR ACTIVITIES

- | | |
|---|--------------------|
| • Chairman of Exco Pembangunan Insan <i>PEERS Club UiTM Jasin</i> 2023 | |
| • Vice Secretary <i>HackerHunt: Exploring Computer Science Using Sign Language</i> | 10 May 2023 |
| • Secretary <i>Mental Health Awareness Carnival UiTM Jasin</i> | 5-11 December 2022 |
| • Mentor & Facilitator <i>Program Sederap Bersama Impian Terlaksana</i> | 12 November 2022 |
| • Committee Members <i>Program Operasi Khidmat Masyarakat</i> | 13 – 18 June 2022 |
